

CORPORATE PROFILE

Simplicity.
Serviceability.
Durability.

WHO WE ARE

AROW Global Corp. has been operating in Canada and the United States since 1965, specializing in the design and production of transportation window systems for major North American bus and recreational vehicle manufacturers since 1980.

Our mission is to develop innovative solutions for our customers in the transit, service vehicle and off-highway vehicle industries. These solutions leverage our core competencies into exceptional value for our stakeholders. We constantly strive to do this better and faster in a cost efficient manner.

As part of our commitment to product innovation and vehicle safety, AROW Global has entered into the driver protection market. The company now designs and builds custom driver protection systems specific to client application and equipment.

We will continue to seek out additional opportunities to expand our product offering to better serve our customers.

COMPANY VALUES

Strong traditional values have guided our company from day one which is why AROW Global is the trusted supplier in the industry. Honoring our values allows us to provide our customers with best-in-class design expertise, product innovation, comprehensive product support, and custom engineered solutions.

Integrity - Doing the right thing in our words and actions even when it is difficult.

Responsive - Timely and effective support of others in alignment with business needs.

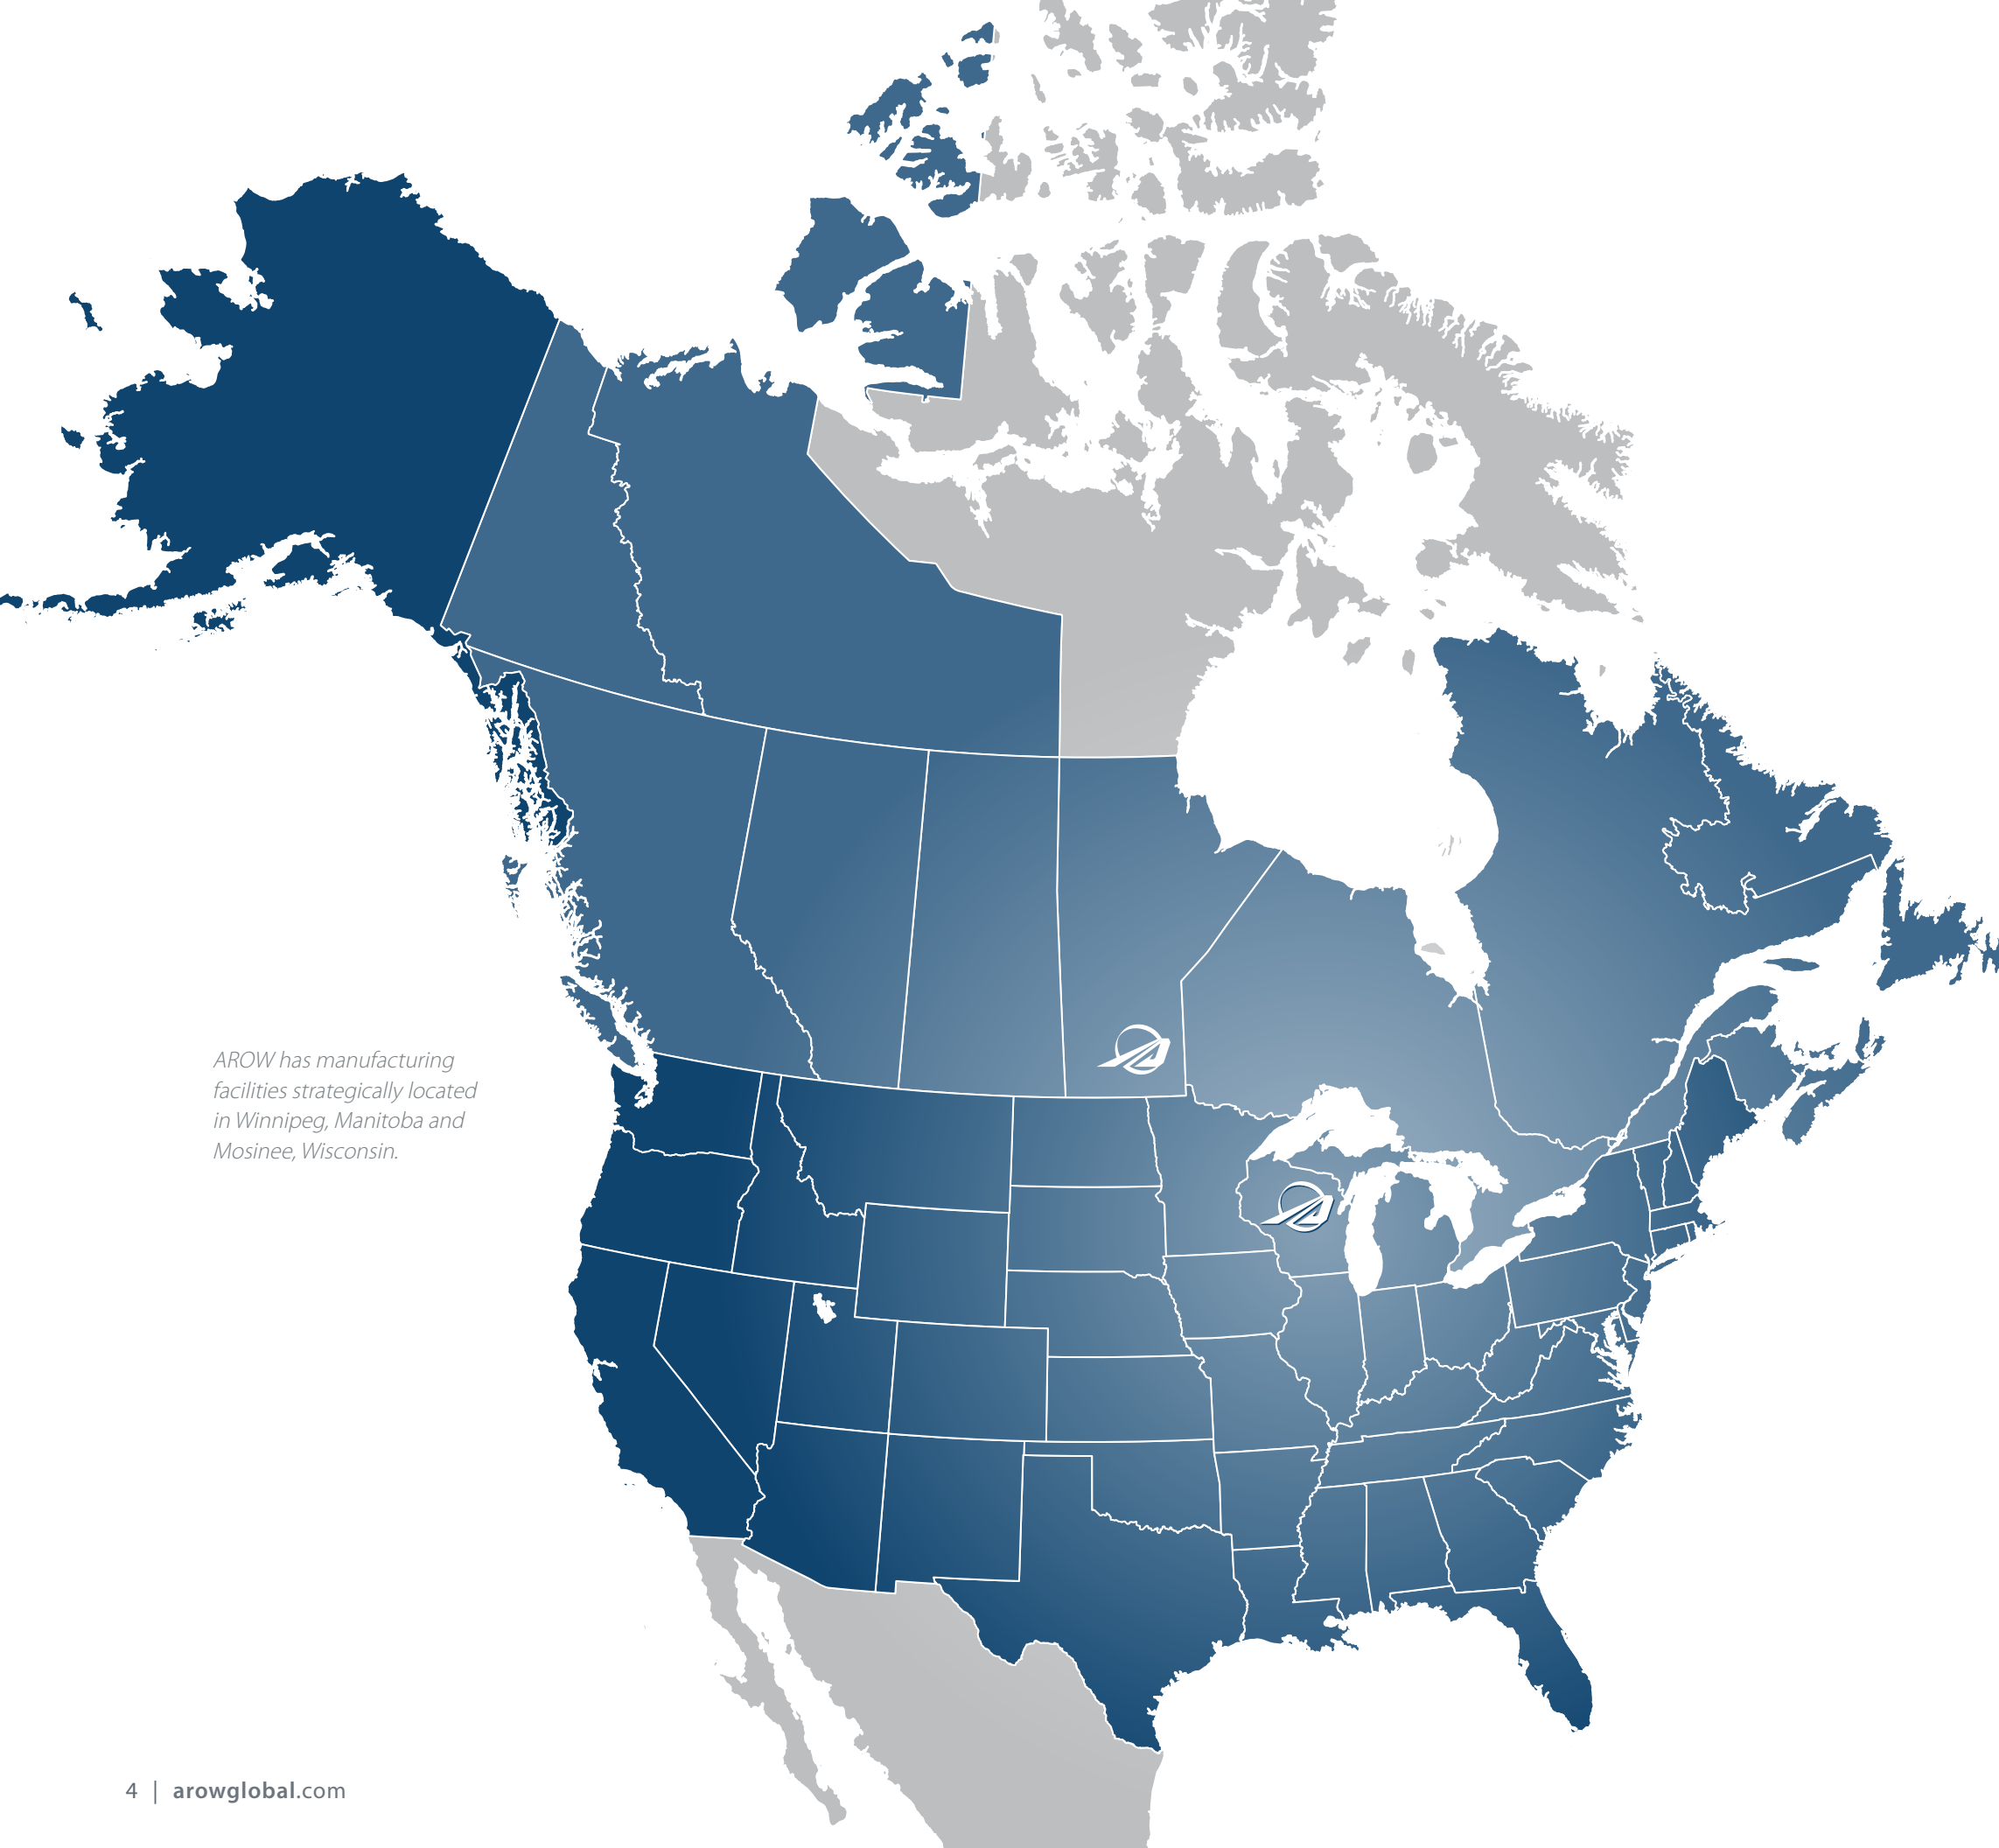

Safety - An environment which includes establishing and maintaining safety practices and a respectful culture.

Community - A unified network of relationships built upon the contributions of many unique and talented individuals.

Excellence - Striving to always improve and to be our best in everything we do as individuals and as an organization.

Ownership - Demonstrating responsibility and accountability to our work and contributions.

WHEN YOU CALL ON AROW YOU CAN ALWAYS COUNT ON:

Availability - Someone is always there to answer the phone or reply to an email, and we encourage direct contact with our technical team.

On-time delivery - Coast-to-coast.

Superior product quality - All of our products surpass ANSI, SAE, and FMVSS testing and are designed to meet your needs.

Comprehensive product support - Before and after the sale.

At AROW Global, we focus on delivering exceptional customer service from the moment we first meet you. Our team takes the time to listen to your every need to develop a solution that is suited to your specific application. We believe in partnering with our customers through solution development to assure a strong relationship throughout all functional areas.

AROW has manufacturing facilities strategically located in Winnipeg, Manitoba and Mosinee, Wisconsin.

INNOVATION DRIVEN BY PEOPLE

AROW Global prides itself on having superior products at competitive prices; the key to our success is our people. Investing in the development of our employees through "Truly Human Leadership" creates an empowering work environment resulting in innovative ideas and superior customer satisfaction. Our company has been able to establish itself as the industry leader through fostering collaborative work environments and developing strong relationships with all of our industry partners.

- Attendance at industry tradeshows and conferences allows us to ensure we are incorporating the latest technology and innovations into our products.
- Maintain representation on various APTA committees to support the advancement of the transit industry.
- Through strategic partnerships AROW Global is able to offer its customers the most advanced products in North America.

TRANSIT WINDOWS

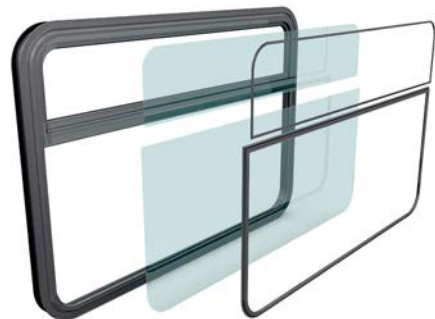

EVOLUTION

FRAMED WINDOW SYSTEMS

AROW's Evolution Framed Window Series combine the economies of traditional transom-hinged egress window designs with the premium performance and features associated with our legacy windows. Available in either standard or rapid-replacement glazing configuration and with or without hidden clamp-ring fasteners, the Evolution Series can be equipped with all available graffiti protection options offered including our third generation sacrificial protection shields that can be replaced in less than one minute. Available in all common glazing and window configurations, a superior and updated low-profile appearance adds an exceptional aesthetic appeal to this series of windows.

All windows available in egress and non-egress configurations

Rapid Replacement/Quick Change: glazing retention is facilitated by a single proprietary welded spline which is designed to withstand multiple installations.

STORM-TITE

FLUSH WINDOW SYSTEMS

Our signature Storm-Tite brand Flush Window Series was designed to address the needs of the more style-conscious fleet operators that place a high value on road appeal. With an exterior comprised entirely of tempered safety glass or polycarbonate, the windows don't include the use of painted metal panels that are susceptible to fading from environmental exposure, and therefore provide a consistent exterior appearance. Available in either serviceable or non-serviceable design configuration, and with or without hidden clamp-ring fasteners, this model series utilizes the same superior water management system that is typical for AROW Global products and combines a simple, high-performance design with attractive interior and exterior aesthetics.

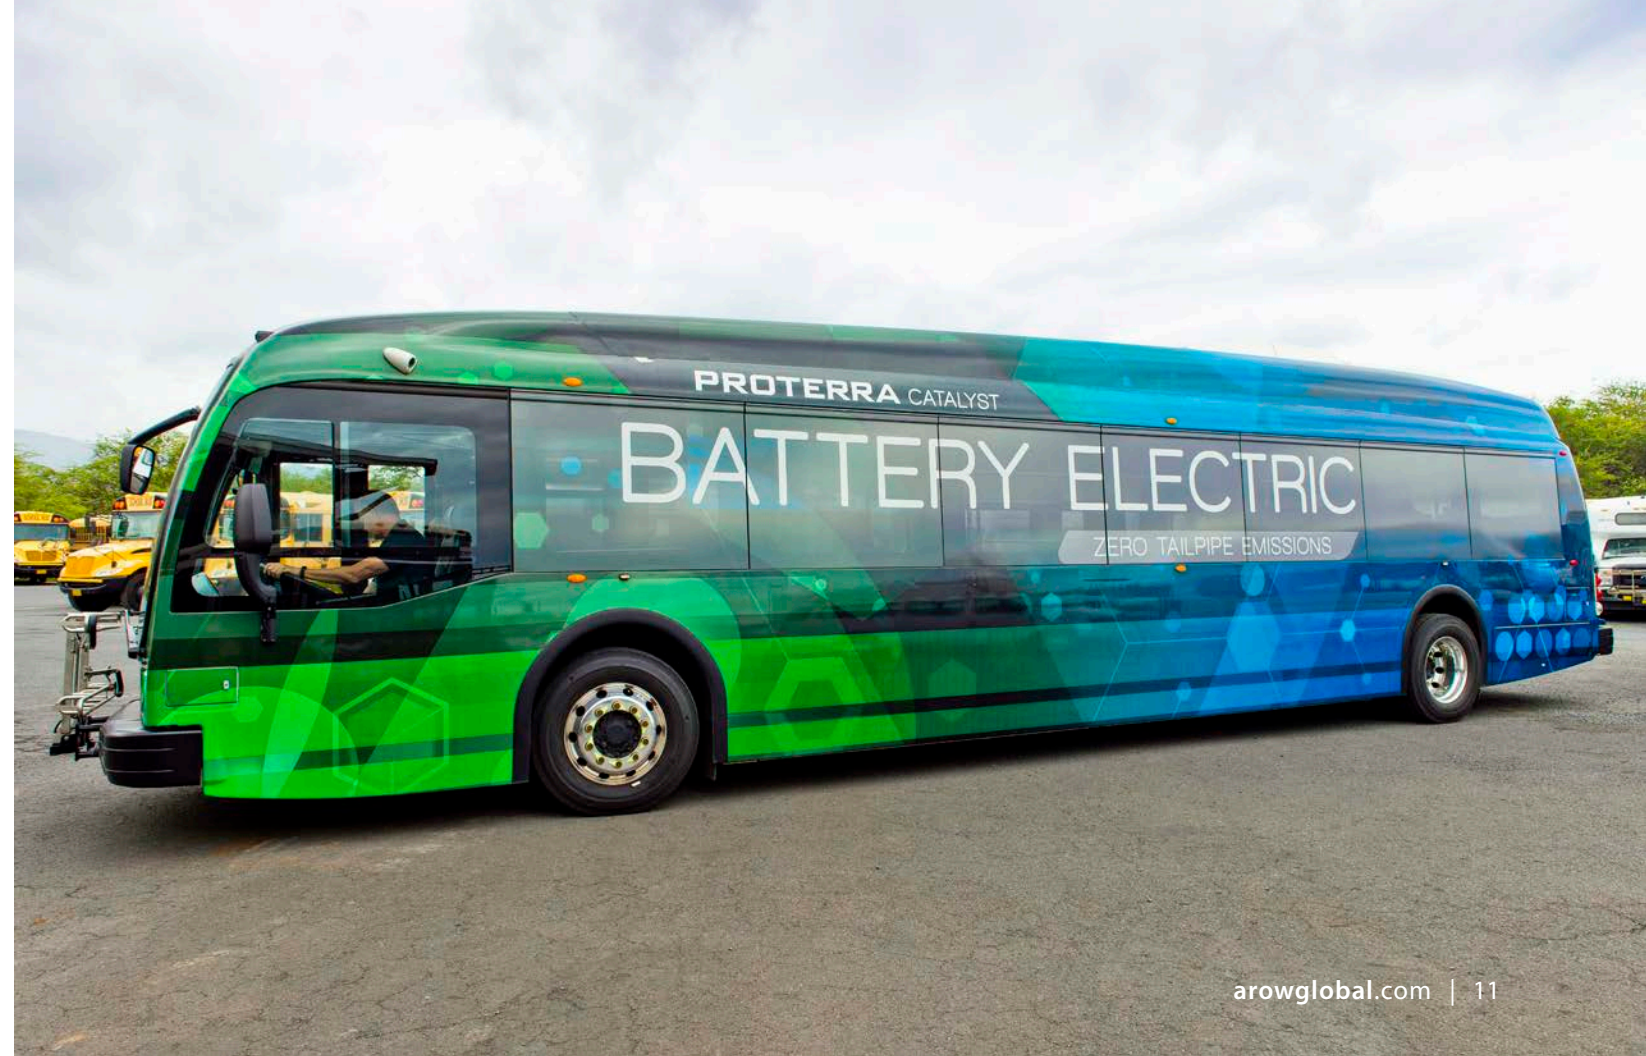

All windows available in egress and non-egress configurations

Serviceable glazing: replacement of glazing assembly requires removal of a few fasteners and manipulation of upper hinge joint.

Non-serviceable glazing: these windows have no hinging mechanism and are mounted directly onto the bus.

Standard Configuration

Extended Front Configuration

DRIVER PROTECTION SYSTEMS

AROW Global has developed a configurable low-noise, highly-durable driver protection solution suitable for multiple transit vehicle platforms. Our team of engineers will work closely with you to determine the best driver protection system for your fleet of vehicles.

PRODUCT HIGHLIGHTS

- Select from an existing configuration or custom design for a specific application and vehicle platform.
- Multiple configuration options to permit stowing of door assembly and/or upper shield.
- Seamless integration into existing driver environment.
- Glass or scratch resistant polycarbonate shield construction.
- Proprietary Rapid Replacement glazing system permits replacement in three minutes or less.
- System design assures adherence to ADA regulations without obstructing passenger flow.
- Easy open/close proprietary latch system assures consistent performance.
- Heavy-duty rotary slam latch designed for long-term, rattle-free use and durability.
- Contoured door design maximizes driver elbow room.
- Robust welded aluminum lower panel provides lightweight, durable, and long-lasting protection.
- Tubular structural mounting system complements existing stanchion infrastructure.

SERVICE VEHICLE AND OPERATOR CAB WINDOWS

ENVISION

The Envision window series is designed for service vehicles and operator cab enclosures. Understanding that your customers have different needs and requirements, we've designed a series of windows that can be configured into multiple vehicles. This new window series utilizes the same superior water management system that is typical for AROW Global products and combines simple, high-performance components to creating attractive interior and exterior aesthetics.

FEATURES

- Class 1 anodized frame finish is applied after all machining and forming operations are completed. Having no unfinished surfaces ensures long-lasting performance and resistance to corrosion.
- All sealant materials are UV stable.
- Superior weather-tight design – windows are water tested to a minimum pressure of 40 psi.
- Built with materials that conform to the applicable requirements of ANSI Z26.1 safety glass.
- Windows are cycle tested to ensure durability.
- A custom-designed handle and latch make operating the slider effortless for the operator, even with the use of gloves.
- Several mounting options available: locking gasket, clamping, bonded, bolted.
