

Structure Integrated Hinge

Full Fixed Configuration w/ Egress Release at Sill (Interior view)

Full Fixed (Exterior view)

Rotary Latch on Egress Configuration

Product Features:

- Designed for an installation that is integrated into the structural opening, reducing installation labor, materials, and cost.
- Suited for installation into structural openings with square corners and for bus interior designs that are intended to be finished without a window clamping.
- Hinge system can be integrated into structure or attached separately.
- Latch and retention mechanisms mount directly to structural opening.
- Available with single pane and dual pane insulated glass options in full fixed configurations.
- Available in egress and non-egress configurations.
- Superior weather tight design utilizes premium fasteners and hardware
- Black or clear Class 1 anodized frame finishes are standard with no unfinished surfaces
- Built and tested in accordance with FMVSS 217 guidelines with materials that conform to the applicable requirements of ANSI Z26.1 and the recommended practices defined in SAE J673
